

FI70 Becomes A Fully-Functional Display & Setup Device for SCX20 & SC33 With Latest Software

May 27, 2020
Service Advisory #2020-09T

We're pleased to announce a software update is now available for the FI70 Instrument display. As of Tuesday, May 26th, all FI70 Instruments are being shipped with version 1.11 software, which includes new Menu Settings and Display Options for different modes.

New Features & Enhancements :

New Setting for SCX20 and SC33 - In addition to the well-known, standard features of the FI70, you can now set detailed location of the satellite compass, using the newly added settings.

Satellite Compass Indicator

- 3-Axis Speed Indication
- Heave Indication
- Sky Plot with SCX20 and SC33 - Satellite status of the GPS antennas can be displayed

Example of 3-Axis Speed Display
