New Software Available for S2009 / S2016

Product:	000-12185-001; 000-12187-001
Product Description:	S2009 and S2016
Software Version:	S2000-1.3-57.1.207-Standard-1.upd
Effective Date:	August 9, 2017
Inspect/Update Current Inventory:	Yes

We are pleased to announce the release of a new software upgrade for Simrad® S2009 and S2016 fishfinders. This release merges the S2000 fishfinder series into the current stream of NOS57 software. The software also provides some improvements and bug fixes.

Please ensure other MFD's, sonar modules and StructureScan® 3D are also upgraded to NOS 57.x.xxx to provide compatibility across your network.

Improvements

1. Changes to the menu structure to make it easier to set up single or multi sonar networks.

2. Improvement to the depth search and bottom tracking. This forces a deep search when the unit is locked on a shallow depth value.

To upgrade the software:

1. Download the software file from www.simrad-yachting.com
2. Copy the file into the root directory of an SD Card (do not place the file into a folder on the card).
3. With the S2009 or S2016 turned off, insert the SD card into the card reader of the fishfinder.
4. Turn on the fishfinder and the update will be automatically applied.
