

TECHNICAL SERVICE BULLETIN  
Document Number: TSB-N2KView\_5.1.7  
Date: September 26, 2017

Release to Manufacturing: N2KView® Version 5.1.7

Maretron announces the release of version 5.1.7 of the N2KView® NMEA 2000® Network Display Software. The program is available from (<http://www.maretron.com/downloads>), under the "Software Updates" category.

The full build number of the version is 5.1.7.20170927

**Changes in N2KView version 5.1.7 from 5.1.6**

- Corrections
  - Corrected display of Device Instance in local display (4259)
  - Prevent using NMEA 2000 Time Offset from crashing the program when the PGN data is unavailable (4339)
  - Prevent temperature difference calculations from crashing the Parameter List when 2nd temperature is unavailable (4340)
  - Prevent N2KView from accepting Remote Alerts with Alert Id = 0xFFFF (4347)
  - Only accept a Date and Time from the GPS if the position is valid (4351)
  - Correct Conversion of Flow Rate to gal/min (4352)
  - Remove references to 'Elite' and 'Q Logic' (4353)
  - Correct display of Reset Date in Connections Dialog (4354)
  - Allow rudder instance messages from Simrad with rudder instance set to 255 (4357)
  - Corrected display of negative Trip Volume in PGN 65287 (4361)
  - Eliminated flicker on TSM800C and 1330C platforms when woken up from screen blanking. (4373)
  - Include System Files Version 20170926 to prevent corruption of Serial number which caused N2KView to lose CAN communication (4374)
  
- New Features
  - Added an Alert/Vessel Mode table to enable easy enabling and disabling of alerts (4266)
