---

We are pleased to announce new software for Simrad® GO series displays. This major release incorporates some great new features and improvements including:

- New control bars for quick Autopilot, Audio adjustments
- Unlockable features available from the GoFree Shop (GoFree unlock)
- Support for Search and Rescue operations

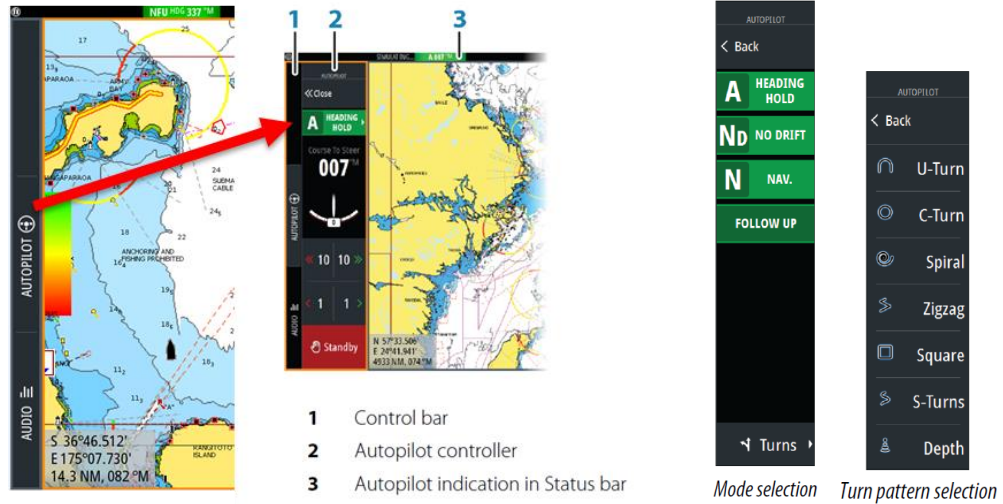

The software and release notes can be downloaded from the downloads page on the Simrad-yachting website.

## New Features

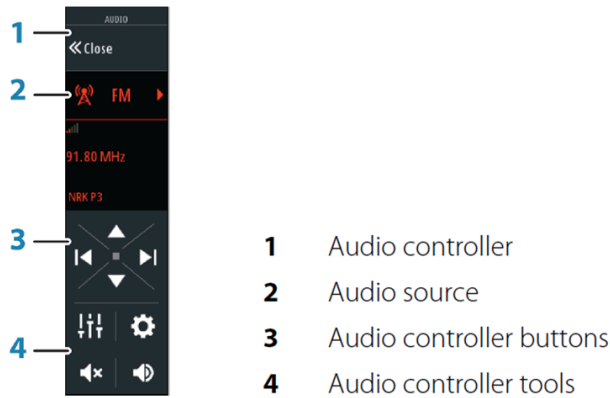

### Control bars:

The controls for a connected Autopilot or Audio server are now accessed from the new control bar located on the left side of the screen.

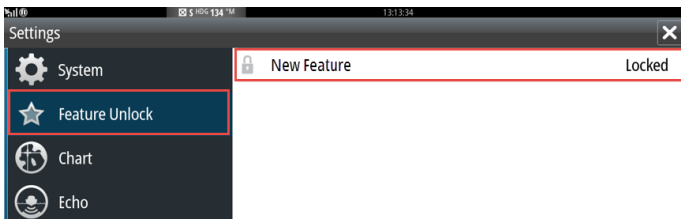

Selecting the Autopilot control button will reveal the Autopilot controller, showing the active mode, heading, rudder and various steering information, depending on active autopilot mode.

Selecting the Audio control button will reveal the new Audio Controller

Additional functionality and features can now be purchased and unlocked on the display using the new Feature Unlock menu item under Settings. (This is only visible when a compatible device is connected)

## FIXES

- Resolves issue where East/West identifier was missing from WPTs when the coordinate system was set to Degrees/Minutes/Seconds
- A power control fix has been implemented to work with Fusion® MS-BB300 radios.
- Screenshot files are now named using the Date and Time. The new file name format is "Screenshot\_2017-07-06\_05.01.12.png". The previous file name format was "shot001.png"
